YUKON/YUKON DENALI

Up to 575* SUPERCHARGED HP

We've been providing high performance vehicles for GM, its dealers and for GM performance enthusiasts for over 25 years. From 1996-2002, we built over 55,000 Camaro SS, WS6 and Firehawk Specialty Vehicles as GM's Tier One supplier. That means only one thing, GM considers us as an approved vehicle upfitter.

With many years of supercharger installation experience, we recognized the need for an OEM-quality supercharger, offering reduced installation time and improved performance. The SVE centrifugal supercharger for the 2016-'17 Yukon/Yukon Denali, incorporates all of those necessary improvements through extensive design work and testing, resulting in OEM-quality installation, serviceability, and great performance.

The SVE Centrifugal Supercharger Package for GM's new SUV applications will impress you from the moment you start the engine to the first time you have to pass a slow moving vehicle on the highway.

*575 Horsepower Available with 6.2L Only

2016 SPORT EDITION 575 Horsepower Supercharged Yukon Denali shown with 2" Front/3" Rear Suspension Lowering Package (optional); 575HP Hood Cowl Badges (standard); SPORT EDITION Supercharged Door Badges (standard); Body Color Painted Grille Surround (optional); SVE 22" 12-Spoke Chrome-finish Wheels with SE Center Caps (optional)

NEW SVE CENTRIFUGAL SUPERCHARGER

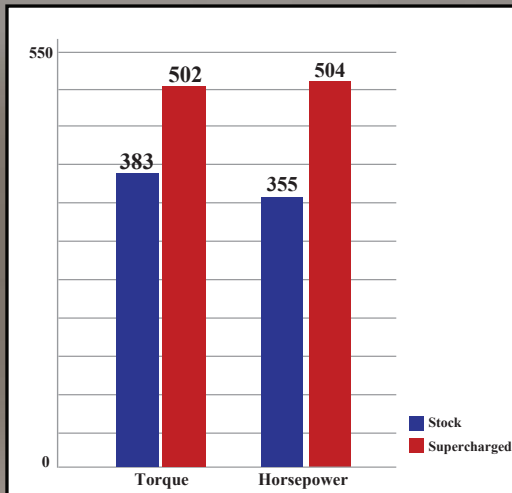

SVE Supercharger Benefits:

- Easy installation. No need to remove the stock intake manifold thereby maintaining great low-end torque.
- 50 state emission legal. E.O. #D-187-22
- Package includes all necessary installation hardware.
- Custom performance tune included.
- Installs in 4 hours or less.
- Quiet operation under boost and during normal driving.
- Included High-efficiency Air-to-Air intercooler requires NO wiring or additional coolant pumps.
- Lower intake air temperature provides increased overall HP and torque.
- Includes closed loop supercharger oiling system with cooler which is SEPARATE from engine oiling system, allowing the supercharger to remain cool and engine oil to remain unaffected.
- Produces up to 575HP and 575 ft-lbs at the flywheel when installed on the 6.2L direct injection engine. Flywheel HP and torque comparisons between stock engine and SVE supercharged engine are shown below.
