SPORT EDITION

SUPERCHARGED

700HP / 800HP

Sierra **OFF ROAD**

WARNING: This vehicle produces excessive amounts of horsepower. Horsepower is addictive and can cause heart palpitations, feelings of exhilaration and euphoria.

The ultimate off road...

SPECIALTY VEHICLE ENGINEERING INTRODUCES THE **2023 700HP (5.3L) AND 800HP (6.2L) SPORT EDITION SIERRA OFF ROAD**. AVAILABLE ONLY ON 2023 4WD CREW CAB AND DOUBLE CAB MODELS WITH SHORT BED OR STANDARD BED. ONLY AVAILABLE FROM YOUR GM DEALER.

Nitto Ridge Grappler Off Road Performance tires offer a quiet and comfortable ride, while the deep aggressive tread pattern provides excellent off road performance as well

OPTIONAL retractable side steps instantly extend when you open the door, and retract out of sight when the door closes

The custom fender inserts are OEM-quality components that feature a brushed aluminum finish with Sport Edition Supercharged in red and black

The powerhouse engine and supercharger assembly on our 2023 **SPORT EDITION Supercharged** Sierra Off Road delivers **700HP (5.3L)** and **800HP (6.2L)** and represents the latest in state-of-the-art performance engine technology. It features a blueprinted aluminum block, race-quality computer-balanced rotating assembly, including forged 1538MV twisted steel crankshaft and forged aluminum pistons, upgraded cylinder heads, and our own high-output supercharger assembly.

A custom stainless steel exhaust system is also included (requires factory dual exhaust system). **NECK-SNAPPING PERFORMANCE**

NOT FOR THE FAINT-AT-HEART!

NOW AVAILABLE WITH 91 OR 93 OCTANE CALIBRATION!

Supercharger comes standard in black. Custom colors optional. shown in body color paint.

WITH ADDITION OF OUR NEW, PATENT PENDING BOOST-BY-WIRE™ CONTROL SYSTEM, YOU NOW HAVE THE BENEFIT OF FULL VARIABLE BOOST CONTROL!

As a consequence of using positive displacement superchargers as a power adder, you can have drivability issues under normal driving conditions. Since the power comes on like an "on/off" switch, it makes it difficult to control power demand in situations where you do not want maximum acceleration and can be unpleasant to drive. We solved this problem with our Boost-By-Wire™ Control System, eliminating the problem completely. The system we've developed works very simply; the more you press the accelerator pedal, the more boost your supercharger will produce. You still get all the neck-snapping instant power from the positive displacement supercharger, but it is now controlled with your foot as you need it and makes the vehicle much more pleasant to drive.

...hot rod truck!
