TRUCK!

The powerhouse engine and supercharger assembly on our 2023 YENKO/SC® Silverado delivers **700HP** (5.3L) and **800HP** (6.2L) and represents the latest in state-of-the-art performance engine technology. It features a blueprinted aluminum block, race-quality computer-balanced rotating assembly, including forged 1538MV twisted steel crankshaft and forged aluminum pistons, upgraded cylinder heads, and our own high-output supercharger assembly. A custom stainless steel exhaust system is also included (requires factory dual exhaust system).

**Neck-snapping performance not for the faint-at-heart!
NOW AVAILABLE WITH 91 OR 93 OCTANE CALIBRATION!**

**WITH ADDITION OF OUR NEW, PATENT PENDING
BOOST-BY-WIRE™ CONTROL SYSTEM, YOU NOW
HAVE THE BENEFIT OF FULL VARIABLE BOOST
CONTROL!**

As a consequence of using positive displacement superchargers as a power adder, you can have drivability issues under normal driving conditions. Since the power comes on like an "on/off" switch, it makes it difficult to control power demand in situations where you do not want maximum acceleration and can be unpleasant to drive. We solved this problem with our Boost-By-Wire™ Control System, eliminating the problem completely. The system we've developed works very simply; the more you press the accelerator pedal, the more boost your supercharger will produce. You still get all the neck-snapping instant power from the positive displacement supercharger, but it is now controlled with your foot as you need it and makes the vehicle much more pleasant to drive.
