

2024/25

1000HP Supercharged

YENKO/SC SILVERADO 2500/3500 HD

OFF ROAD

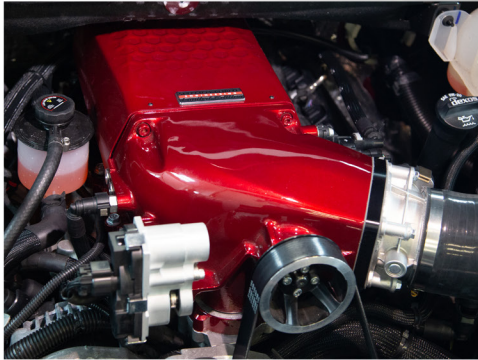

WARNING: This vehicle produces excessive amounts of horsepower. Horsepower is addictive and can cause heart palpitations, feelings of exhilaration and euphoria.

Specialty Vehicle Engineering introduces

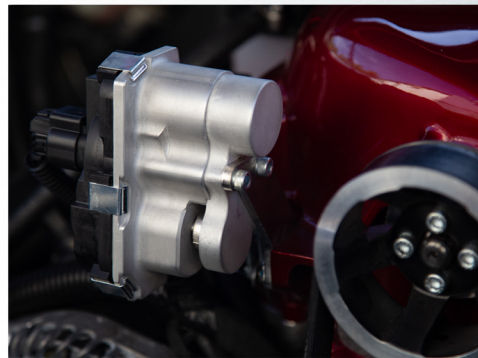

the new for 2024/25 1000HP YENKO/SC[®] supercharged Silverado 2500/3500 Heavy-Duty Off Road pickup truck.

Only available on all 2024/25 4WD models of crew cab and double cab trucks with 10-speed transmission, standard bed or long bed, and only available from your GM dealer. With our high-output supercharged powerplant*, they'll go fast... literally! Available with 91 or 93 octane calibration! (Gas powered, single rear wheel models only)

This powerhouse engine and supercharger assembly on our 2024/25 YENKO/SC[®] Silverado HD Off Road delivers **1000HP** (6.8L) and represents the latest in state-of-the-art performance engine technology. It features a blueprinted block, race-quality computer-balanced rotating assembly, including a 4340 steel crankshaft, forged aluminum pistons, upgraded cylinder heads, and our own high-output supercharger assembly. A custom stainless steel exhaust system is also included.

NECK-SNAPPING PERFORMANCE NOT FOR THE FAINT-AT-HEART!
NOW AVAILABLE WITH 91 OR 93 OCTANE CALIBRATION!

INCLUDES OUR PATENT PENDING BOOST-BY-WIRE™ CONTROL SYSTEM AND DEDICATED DRIVE SYSTEM

As a consequence of using positive displacement aftermarket superchargers as a power adder, you can have drivability issues under normal driving conditions. Since the power comes on like an "on/off" switch, it makes it difficult to control power demand in situations where you do not want maximum acceleration and can be unpleasant to drive.

We solved this problem with our **Boost-By-Wire™ Control System**, eliminating the problem completely.

The system we've developed works very simply; the more you press the accelerator pedal, the more boost your supercharger will produce. You still get all the neck-snapping instant power from the positive displacement supercharger, but it is now controlled with your foot as you need it and makes the vehicle much more pleasant to drive.

MORE POWER FOR WORK...

Need to haul with a sense of urgency? This pickup truck on steroids is more than up to the task. Our 1000HP YENKO® Silverado 2500/3500 HD Off Road could easily qualify as the quickest, limited production* full-size heavy-duty pickup for the 2024/25 model year.

***NOTE: Only 50 each 2024/25 1000HP YENKO/SC® Silverado HD Off Road pickup trucks will be built.**

Iconic YENKO® emblems are proudly displayed on the fenders and grille to let everyone know this is no ordinary Heavy-Duty Silverado
