

2025

1000HP STAGE I / 1250HP STAGE II

TWIN TURBOCHARGED

YENKO/SC[®]

C8 CORVETTE

WARNING: This vehicle produces excessive amounts of horsepower. Horsepower is addictive and can cause heart palpitations, feelings of exhilaration and euphoria.

The **Ultimate** Corvette

In 1969 the muscle car wars were in full swing, with GM, Ford and Chrysler each developing their own big-block powered performance cars. Not to be outdone, Chevrolet's Central Office Production Order (COPO) system produced a limited run of Camaros with the now infamous ZL-1 all-aluminum big-block engine, and just two very rare ZL-1 factory-built Corvettes.

Now in the spirit of those awesome ZL-1 Corvettes, Specialty Vehicle Engineering will build 50 2025 C8 YENKO/SC® 1000HP Stage I and 1250HP Stage II Corvettes, and they'll all go very fast.... literally!

...from the **#1** GM

Experience...

For more than 30 years, Specialty Vehicle Engineering has been a Second Stage Vehicle Manufacturer and Tier One Supplier to GM and its dealers, having built over 65,000 cars, trucks, and SUV specialty vehicles making us the #1 GM Specialty Vehicle Manufacturer in the USA! That's why our company was chosen as the exclusive builder of the current generation YENKO® Supercars!

Specialty Vehicle Manufacturer!

*An American-Made
Supercar unlike
any other!*

A Twin Turbo Engineering Masterpiece

Our C8 powertrain is an elegant combination of both precision engineering and art. Our innovative twin turbo design offers both stunning performance and visual symmetry that is impossible to ignore. Available on both coupe and convertible models, this powerhouse features a pair of Garrett 58mm ceramic ball bearing water cooled turbos feeding a blueprinted 6.2L LT2 engine with a forged steel crankshaft, forged H-beam rods, forged 2618 aluminum pistons, ARP high strength head and main studs, CNC ported high-flow cylinder heads with upgraded valvetrain, proprietary ground camshaft, custom intercooled intake manifold, custom valve covers with integrated oil separators, upgraded transmission, upgraded high and low pressure fuel systems, auxiliary port injection, E85 capability, custom tuning, and unique YENKO® exclusive exhaust tips producing 1000 and 1250HP.

Looks *Fast* Standing

The 1000HP Stage I and 1250HP Stage II twin turbocharged powertrain with enhancements such as our Boost-By-Gear control makes our Yenko® C8 Corvette a true supercar.
