

2026

**1000HP Supercharged**

**YENKO/SC SILVERADO 2500/3500 HD**

**OFF ROAD**

**WARNING:** This vehicle produces excessive amounts of horsepower. Horsepower is addictive and can cause heart palpitations, feelings of exhilaration and euphoria.

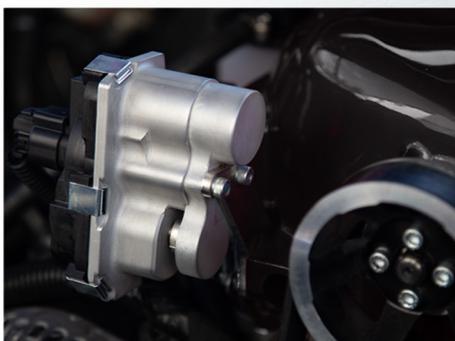

Specialty Vehicle Engineering introduces the new for 2026 1000HP YENKO/SC® supercharged Silverado 2500/3500 Heavy-Duty Off Road pickup truck. Only available on all 2026 4WD models of crew cab and double cab trucks with 10-speed transmission, standard bed or long bed, and only available from your GM dealer. With our high-output supercharged powerplant\*, they'll go fast... literally! Available with 91 or 93 octane calibration!  
(Gas powered, single rear wheel models only)

This powerhouse engine and supercharger assembly on our 2026 YENKO/SC® Silverado HD Off Road delivers **1000HP** (6.8L) and represents the latest in state-of-the-art performance engine technology. It features a blueprinted block, race-quality computer-balanced rotating assembly, including a 4340 steel crankshaft, forged aluminum

pistons, upgraded cylinder heads, and our own high-output supercharger assembly. A custom stainless steel exhaust system is also included.

**NECK-SNAPPING PERFORMANCE NOT FOR THE FAINT-AT-HEART!**  
AVAILABLE WITH 91 OR 93 OCTANE CALIBRATION!

**INCLUDES OUR PATENT PENDING BOOST-BY-WIRE™ CONTROL SYSTEM AND DEDICATED DRIVE SYSTEM**

As a consequence of using positive displacement aftermarket superchargers as a power adder, you can have drivability issues under normal driving conditions. Since the power comes on like an "on/off" switch, it makes it difficult to control power demand in situations where you do not want maximum acceleration and can be unpleasant to drive.

We solved this problem with our **Boost-By-Wire™ Control**

**System**, eliminating the problem completely.

The system we've developed works very simply; the more you press the accelerator pedal, the more boost your supercharger will produce. You still get all the neck-snapping instant power from the positive displacement supercharger, but it is now controlled with your foot as you need it and makes the vehicle much more pleasant to drive.

# **MORE POWER FOR WORK...**

Need to haul with a sense of urgency? This pickup truck on steroids is more than up to the task. Our 1000HP YENKO® Silverado 2500/3500 HD Off Road could easily qualify as the quickest, limited production\* full-size heavy-duty pickup for the 2026 model year.

**\*NOTE:** Only 50 each 2026 1000HP YENKO/SC® Silverado HD Off Road pickup trucks will be built.
